

Virtual Machines

Accessing your VM

Windows

1. Open *Remote Desktop Connection* (installed by default on Windows)
2. Fill the *computer* field with the name you've been given (ipsevmXXX)
3. Use your usual [EPFL gaspar account](#) as credentials

Your login should look like *intranet\username*

Mac

1. Install [Microsoft Remote Desktop 10](#)
2. Open *Microsoft Remote Desktop 10*
 1. The first time, you have to do the following extra steps
 2. Click on the + button on the top of the app and then *Desktop*
 3. Fill the *PC name* field with the name you've been given (ipsevmXXX) and validate by clicking on *Add*
3. In the main interface, double-click on your VM under *Saved Desktops*
4. Use your usual [EPFL gaspar account](#) as credentials

Your login should look like *intranet\username*
