

- Read and introduce the following study:
<https://academic.oup.com/nar/article/47/9/4883/5430835?login=true>
- Briefly repeat the concepts of SELEX and riboswitches (see lecture)
- What is a key challenge/problem in creating riboswitches from SELEX-derived aptamers? How is this addressed in the paper?
- Introduce the Capture SELEX approach
- Present the major findings of the paper
