

Guide for Accessing anyLogistix Team License

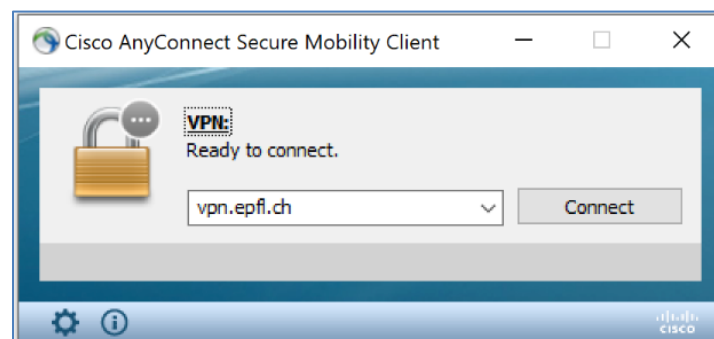

1. License Information

The anyLogistix Team License is a multi-user license designed for organizations, universities, and companies that require collaborative access to anyLogistix. It enables multiple users to work on simulation and optimization models simultaneously, promoting efficient learning and teamwork in supply chain analytics.

2. Connect to EPFL WiFi or VPN

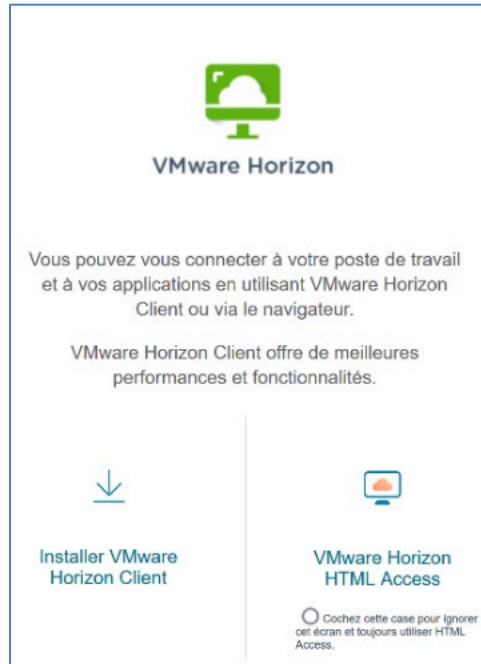

If you are not at EPFL or not connected to the EPFL WiFi, please activate the Cisco VPN.

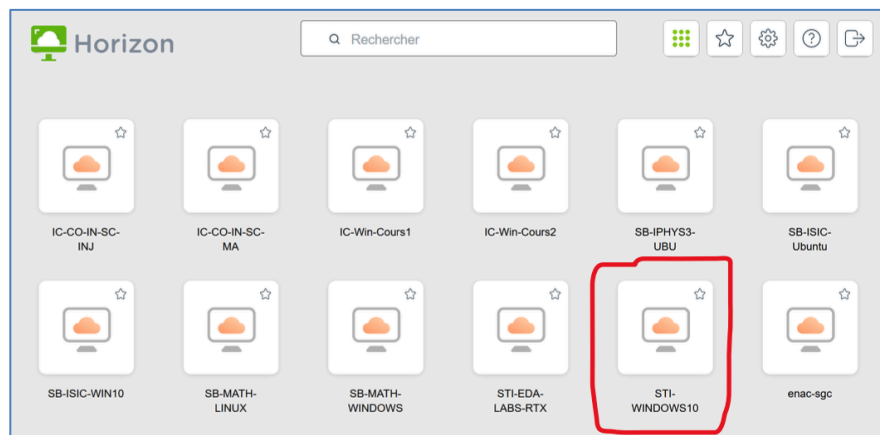

3. Access to anyLogistix

3.1. Once connected, you can go to the following website: <https://vdi.epfl.ch/>. On the website, select HTML Access (or download if you prefer).

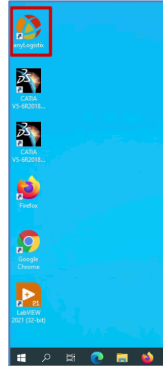

3.2. Log in with your EPFL credentials, and please select “STI-WINDOWS10”.

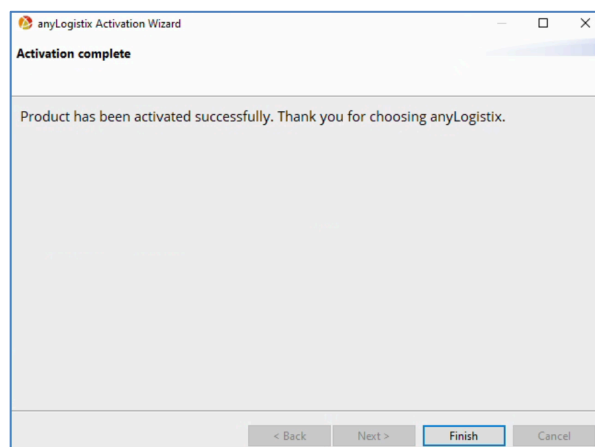

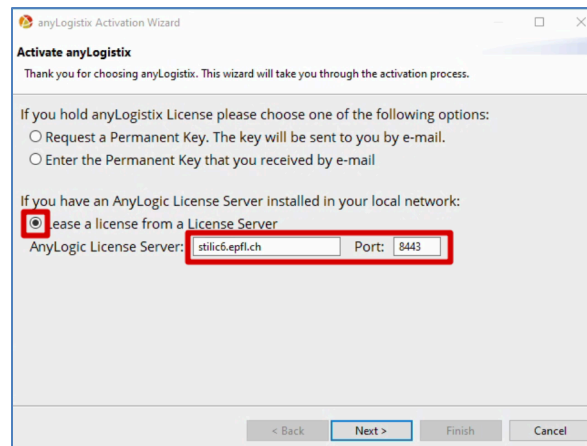

3.3. Each user has a shortcut on their desktop. Click the shortcut to open anyLogistix. After that, you will be prompted to choose a license.

3.4. Choose “Lease a license from a license server.” The information is pre-filled; you only need to verify it and click the next button.

3.5. After that, until your VDI session is activated, you can close and enter anyLogistix without completing the initial steps.

4. Troubleshooting & Support

If you face any issues during the above steps, please reach out to EPFL's IT Support: <https://www.epfl.ch/campus/services/en/it-services/it-support/>
