

4 cas de syndrome d'Angelman

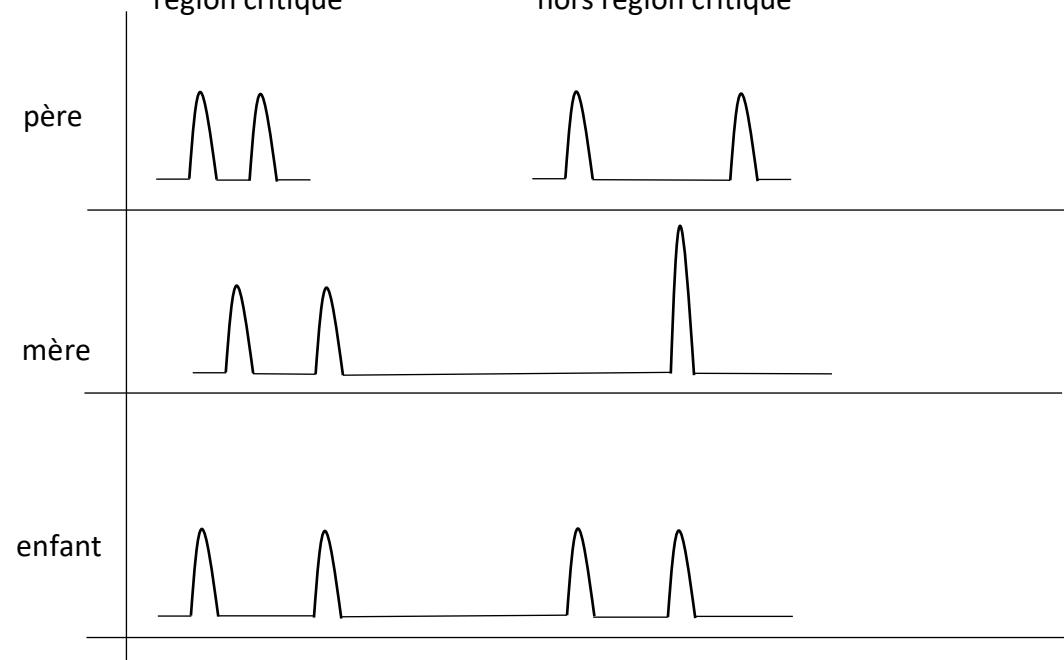

Cas 1

Southern blot

Diagram of a DNA restriction map for a pteridine locus. The map shows three restriction sites: Xba I, Not I, and a 4.2 kb marker. The Xba I site is at the top, followed by Not I, and then the 4.2 kb marker. The Not I site is located between the two Xba I sites. The 4.2 kb marker is positioned to the right of the Not I site. The DNA is represented by horizontal lines with vertical tick marks indicating the restriction sites.
