

Dear Students,

You will find below information regarding the oral exam that will take place on Monday (16/06/2025) between 8:15 and 18:30 in room CM 0 11.

The format of the exam will be as follows:

- 1) After checking your ID, you will randomly and blindly select two (sub-)chapters of the course. Then you will have the possibility to choose one, the other or both. I will then ask you questions in relation with your selection.
- 2) There will be no preparation.
- 3) 20 minutes are allocated in total for the oral exam.

You are not supposed to learn by heart "complex" expressions (such as the RTE, etc). However, the various definitions, classifications, "mechanisms" and orders of magnitudes discussed during the course are important.

Best regards.

G. Wagnières
