

Earthquake Engineering and Structural Dynamics Laboratory

Course: Seismic Engineering 2025

Prof. Dr. D. Lignos, Dr. S. Saloustros, Dr. I. Tomić

Teaching assistant: Jakov Oreb (EESD)

## **Assignment 1**

**To be submitted by 28.02.2025**

For a building of your interest, that you can freely select, present in one slide:

- One or more photos of the building
- its construction year, if known
- its location
- its structural system (if known). If not known or clear, make a hypothesis in line with the typology of the building
- the material of the structural system
- any other information that you deem important and that can support a discussion on the seismic conception of the building

You can work in groups of two. The slide can be submitted as a PDF file to the moodle platform.
