

## Small Project – 2025

Length of the document: 5-6 pages

Objective: Conduct a risk assessment of a situation based on an illustrative image. Please write it as an executive summary, excluding any superfluous details.

Content:

1. Objective: Clearly state the purpose of the assessment.
2. Situation Description: Briefly describe the situation and identify potential hazards.
3. Risk Analysis: Analyze the identified risks.
4. Risk Reduction Measures: Propose and discuss measures to mitigate these risks.
5. Economic Analysis: Evaluate the economic aspects, including cost-benefit analysis and the rationale for investing or not.
6. Recommendations: Provide personal recommendations based on your analysis.
7. Conclusions: Summarize the key findings and outcomes.

General remarks:

- Literature Review: Utilize only pertinent information for your project. Avoid adding extraneous details, ensuring it resembles a management-level executive summary.
- Avoid Plagiarism: Do not copy content from web pages or similar sources. Your work will be assessed for originality.
- Depth and Quality: You are responsible for determining the depth of your analysis and the overall quality.
- Font Size: Use a font size no smaller than 10, preferably 11. If the document exceeds the maximum page limit, provide a justification in the preface.
- Language: You may write the document in either English or French.

Some hints (available in module 1), The project – what is expected?

- Include your name in the report.
- Develop a practical report, like an executive summary, focusing on essential information.
- Clearly state the objectives, with an emphasis on image-based content.
- Describe the hazardous situation to provide context.
- Conduct a comprehensive risk analysis to effectively quantify and assess risks.
- Suggest measures to mitigate risk and discuss their potential impacts.
- Present a detailed action plan for the proposed mitigation measures.
- Include an economic analysis of these measures, with an accompanying discussion.
- Provide your personal recommendations and discuss the evaluated and proposed measures.
- Conclude the report thoughtfully.

*My objective is to assess your understanding of the concept of risk management as evidenced in your project.*
