

Leave-litter decomposition - bags preparation

- 2g of leaves/needles per bag, sewn with fishing wire.
- Double mesh (small and big) for pine needle treatment.
- Each bag needs a unique hole-punched plaque and a colored zip tag (treatment identification) based on the following color code:

Zip tag color	Treatment
Green	Pine needle
Yellow	Shade
Blue	Riffle
Purple	Burried
Red	Control

- Tie the three replicate bags together.
