Exercise 3

Issues, domain and goals for sustainability

TA:

Giulia Frigo,
Ankita Singhvi,
Simon Ladino Cano

Today

- Group formation

- 4 members for each group

- **Goal** of the exercise session: choose **4 cities** and a common **theme** (characteristics, problem) of your interest

- Derive a <u>research question</u>

The RQ should have this structure

"Which of the selected **cities** (A,B,C and D), characterized by a **theme**, is the most **sustainable**?"

...choose a theme

Examples: coastal cities, cities with mass tourism, cities with a high immigration flow, cities with a high level of inequalities, destroyed cities, cities with important cultural heritage

1. What <u>issues</u> does this group of cities face?

RQ: Which of the selected cities *(A, B, C and D)*, characterized by *theme,* is the

most *sustainable*?

…reflect on "sustainability"

2. What does <u>sustainability</u> mean for this type of city?

RQ: Which of the selected cities *(A, B, C and D)*, characterized by *theme,* is the

most <mark>*sustainable*</mark>?

Hint: Think about the goals for sustainability, and which domains they fit into
