Vision

A world without extreme vulnerability

What is extreme vulnerability for you?

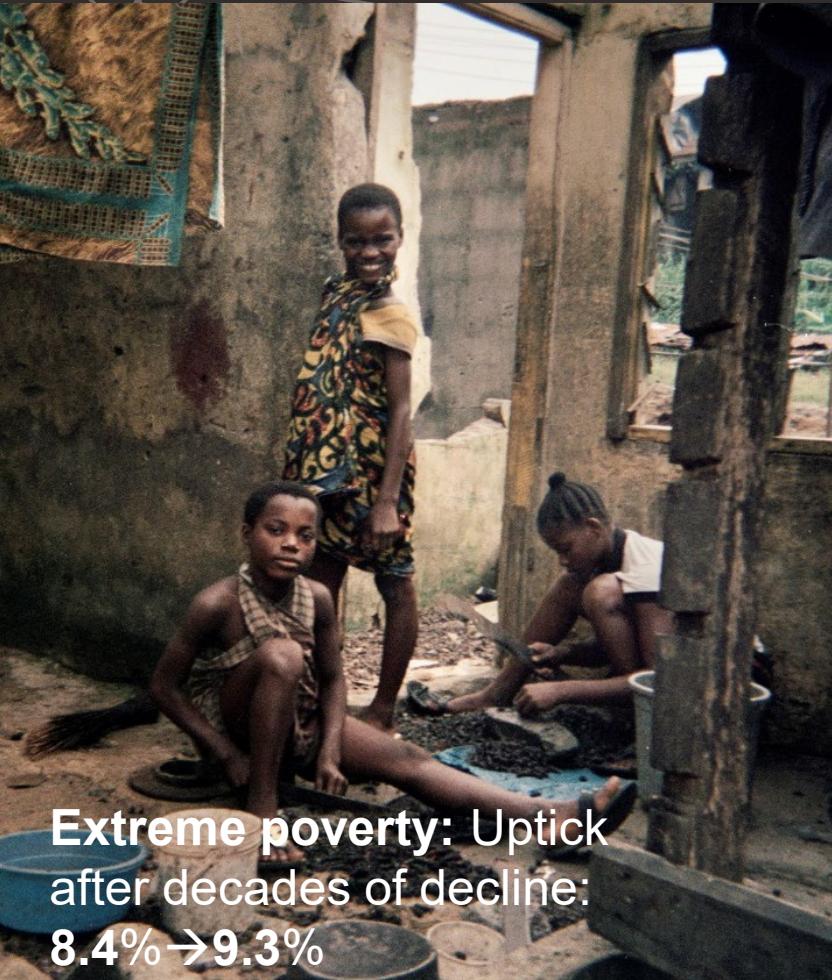

Menti.com

Code: 8718 8179

What do these people have in common? Extreme vulnerability

Extreme poverty: Uptick
after decades of decline:
8.4% → 9.3%

Humanitarian crises
Forcibly displaced: >120m
Need hum. Assist.: >362m

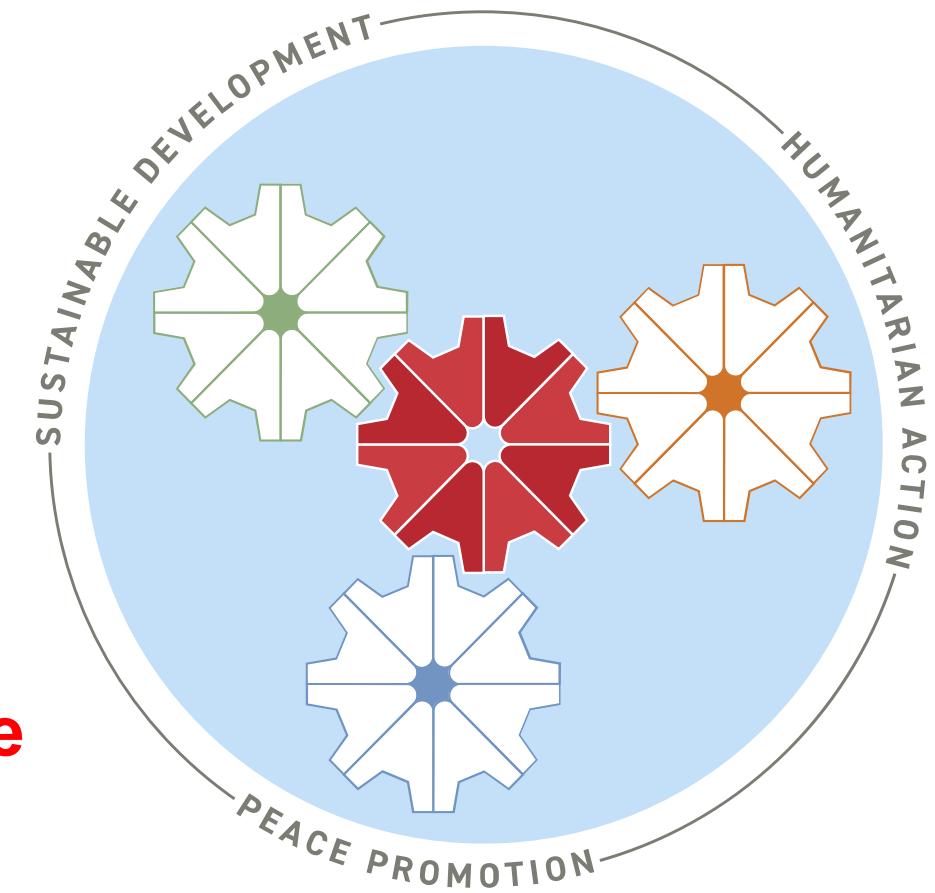

Armed conflicts & violence:
84:2010 → 182:2022,
Avg. duration: x2 in 10y.

Mission

*Harnessing science and technology
to drive sustainable development,
humanitarian action and peace promotion.*

→**Ambition: sustainable impact at scale**

Confusion

Humanitarian action?
Sustainable development?
Peace promotion?

→What do we mean?

Menti.com

Code: 8718 8179

Simple (simplistic) Metaphor

Family:

- Poor, can hardly survive
- ...but have a house

→they are vulnerable

Crisis

"The humanitarians"

Extreme Poverty

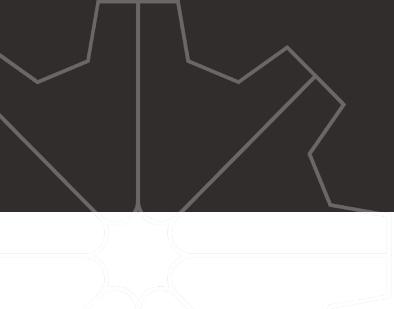

“The Development Actors”

Conflict

“The Peace Promoters”

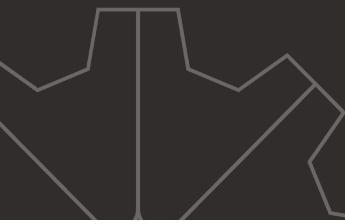

Humanitarian Action

Active provision of aid designed to **save lives, alleviate suffering, and restore and promote human dignity** in the wake of **disasters** and during large-scale **emergencies***.

- **Generally short-term** assistance to people who need urgent help.
- **Principled:** humanity, neutrality, independence and impartiality.
- Enshrined in **Geneva conventions** and protected under **IHL**

Sustainable development (this course)

“Sustainable development is development that meets the needs of the present without compromising the ability of future generations to meet their own needs. [...] in particular the essential needs of the world's poor, to which overriding priority should be given...”

[Brundtland commission, 1987]

→mid/long-term perspective

Peace promotion

Promoting and maintaining
peace.

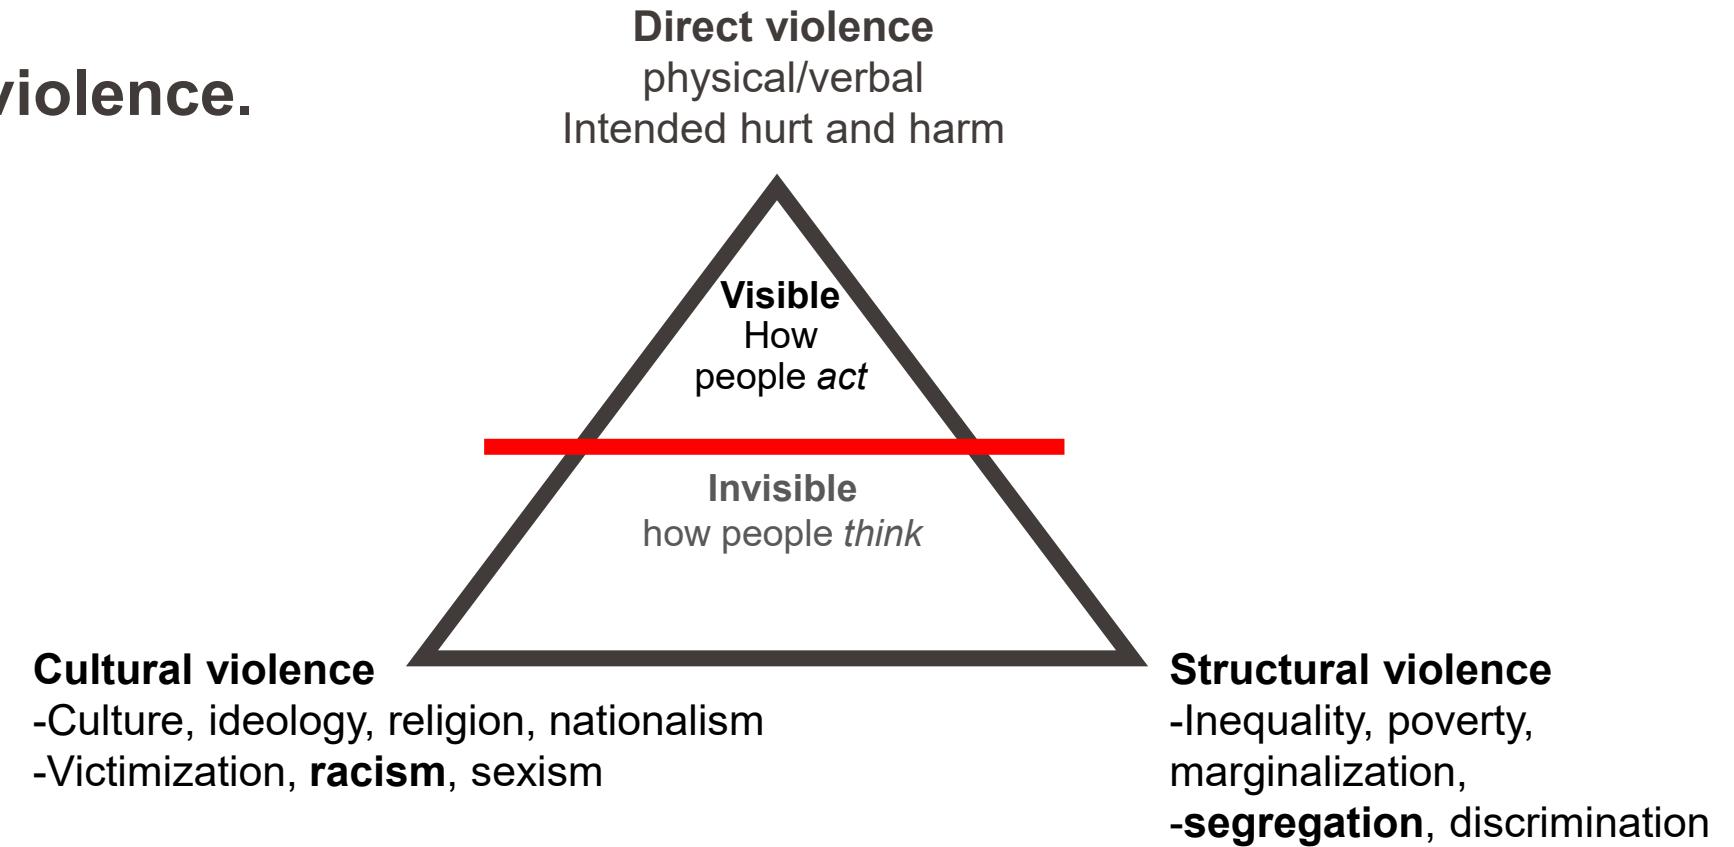

Peace??

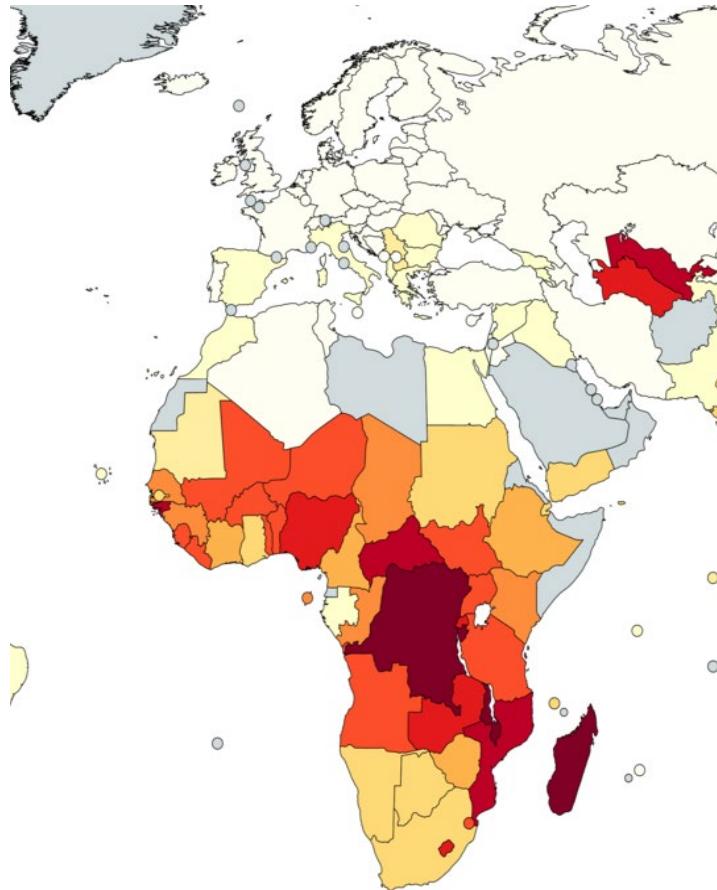

What is Peace?

Absence of all forms of violence.
[Galtung 1964]

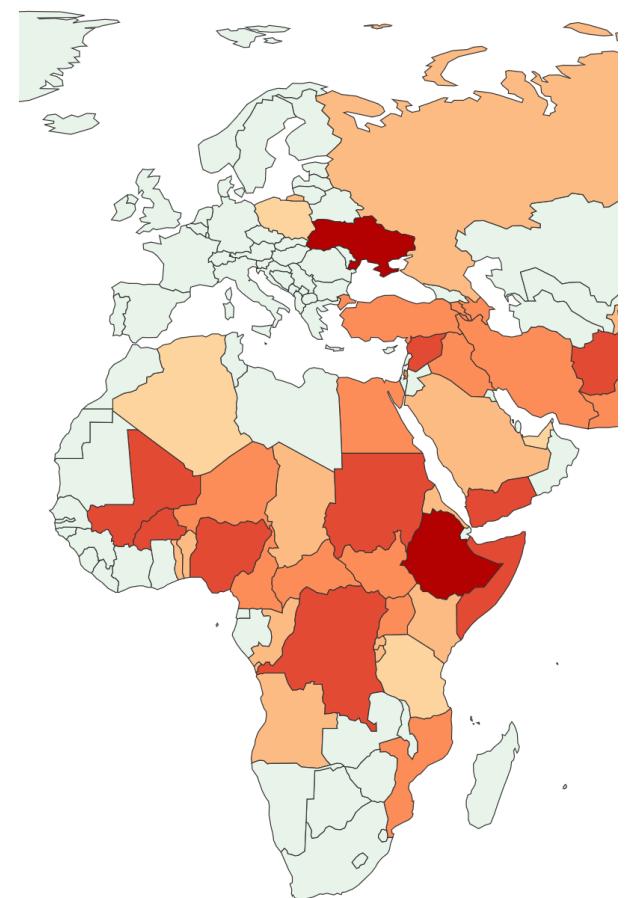

Extreme Poverty

Humanitarian crises

Conflicts

NB: focus on this part of the world only as
an example. The point is valid worldwide

...are interlinked!

Humanitarian-Development-Peace Nexus

This course

- Interconnected & mutually reinforcing
- Often all 3 are present
- Climate change aggravates all 3

Questions? All clear?

A photograph of a young boy with short hair, looking up and to the side with a neutral expression. He is positioned on the left side of the frame, with a dark rectangular object to his left and a metal pipe structure above him.

Expectations/ideas

- What would you like to learn in this class?
- Please feel free to suggest topics!
- It is anonymous.

[Menti.com](https://menti.com)

Code: 8718 8179

Objective

This course teaches the fundamentals of technologies for development.

You will learn to design

- appropriate, affordable and robust technologies
- sustainable and scalable deployment strategies

...to address **sustainable development challenges with a special focus on extreme poverty in Low-income settings.**

Topics

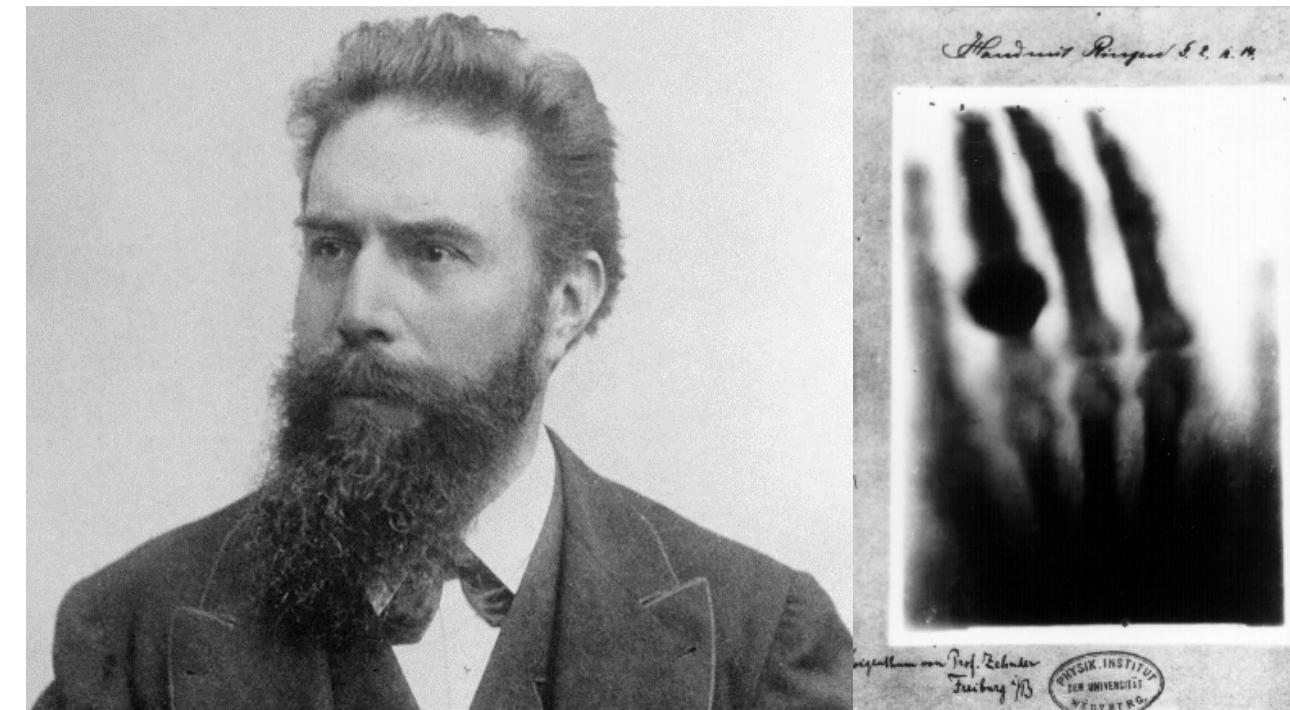

- Poverty
- Sustainable development
- (Tech related) Context of LMICs
- Essential Technology domains
- Tech innovation process
- Impact
- Value chains
- Sustainable Business Models

GlobalDiagnosiX

2011

First Academic
Demonstrator

2015

Final prototype, first
business model, Start-up.

2018

Full commercial solution,
CE marked

2022

A real case study, still in process!

Alexandra 10.2023**Where do
we start?****Soweto 04.2024**

**~2000 patients
diagnosed!**

→Scaling-up!

(Series B investment round
open)

Teaching Model

- Combination of ex-cathedra, flipped classroom & group-work.
- Register in the Courseware MOOC (link on Moodle)
- Viewing specific chapters **BEFORE** course is mandatory!
- No grading of exercises in MOOC (quizzes)
- Typical schedule (exact schedule → check Moodle each week):

Time	Activity
3:15 – 4pm	Watch MOOC videos
4:15 – 5pm	Discussion/Guest lecture, Q&A
5:15 – 6pm	Group work
6:15 – 7pm	

Guest lectures (tbc)

- Humanitarian Action vs Development (Yves, ICRC)
- Governance, fight against corruption (Claudia, Basel Institute of Governance,)
- Medtech (Pristem SA, Romain)
- ICT (Sacha, Fondation Hirondelle)
- Business Models creation (Marc, EPFL)
- M&E (Nathalie, EPFL)
- Energy (Washima, Prado Power)
- Energy (Dave, Energy Peace Partners)
- Food (Dominique, FAO)
- ...and more!

*Attendance is mandatory**

**(Some exam questions will be based on guest lectures)*

Dominique Burgeon

Dave Mozersky

Evaluation method

Group work 1 – Critical assessment (10%)

- Goal: Learn how to assess a technology designed for use in LMIC settings.
- Written: each group writes a 2-pager.

“I would have written a shorter letter, but I did not have the time” [Blaise Pascal]

Group work 2 – Deployment strategy pitch (40%)

- Goal: To be able to propose a robust strategy for a technology deployment.
- Oral: short pitch (10 minutes)

Exam - (50%)

- Goal: To verify good understanding of concepts in the MOOC and guest presentations
- Written: Mix of multiple choice questions + written questions

We reserve the right to adapt individual grades if we see someone is doing all the work in the group, or on the contrary, if someone is not contributing at all.

Group work session

- Groups will be carefully composed (for diversity of backgrounds)
- TAs available 5:15-7:00pm (except when mentioned otherwise on Moodle).
- Independent work is expected:
 - You might need to apply concepts that have not been introduced before.
 - Logical and evidence-based thinking required.
 - Be creative and imaginative.

Spoiler alert: This course is demanding and work intensive!

Tools for the course

- **MOOC:** Courseware, link available on Moodle
- **Slides:** will be made available on Moodle.
- **email**
 - For group work, interaction with TAs on questions related to the projects. (Please do not expect instant responses from the team, except during exercise sessions).
 - For questions related to the course organization.
- **Moodle:** Formal reference for course agenda and material!

Pictures of class

We intend to occasionally take pictures of the class, for our social media.

If you refuse to be photographed, **please email us** and we will of course respect your decision.

Mandatory and Optional Readings

Mandatory:

- “Know your customers ‘jobs-to-be-done’”. **C. Christensen et al.** , Harvard Business Review, September 2016.

Recommended:

- “The Age of Sustainable Development” by **Jeffrey Sachs**.
- “Factfulness: Ten Reasons We're Wrong About the World – and Why Things Are Better Than You Think” by **Hans Rosling**.
- “Business Model Generation - A Handbook for Visionaries Game Changers and Challengers” by **Alexandre Osterwalder**.
- “Why Nations Fail: The Origins of Power, Prosperity, and Poverty.” by **Daron Acemoglu and James A. Robinson**
- “The Fortune at the Bottom of the Pyramid: Eradicating Poverty Through Profits” by **C.K. Prahalad**.
- “Poor Economics: A Radical Rethinking of the Way to Fight Global Poverty.” by **Abhijit V. Banerjee and Esther Duflo**
