

Math-317 (Galois Theory) final exam

Date: Thursday, January 23rd, 2025

Time: 09:15-12:15

Rooms: AAC137

Instructor: Dr. Aline Zanardini < [aline.zanardini@epfl.ch](mailto:aline.zanardini@epfl.ch) >

### General exam instructions:

- Before coming to the exam, please check the distribution of students in the different rooms that will be available on Moodle.
- Arrive early but please note that doors will open at 09:00, meaning that you will only be allowed to enter the exam room from 09:00.
- For the exam, bring at least two ballpens (black or dark blue) and some white correction fluid. This is the only material you will be allowed to use.
- Don't forget your CAMIPRO card!
- The exam is closed-books, no "cheat-sheet" is allowed nor the use of electronic devices. No cell phones!
- There will be scratch/extra paper in the exam booklet.
- Any formulas that you might need to solve the exam will be provided.
- In the first 30 minutes, nobody is allowed to quit the room.
- If you finish more than 15 minutes before the end of the exam, you can leave but first you have to call a proctor.
- Nobody leaves during the last 15 minutes. At the end, everyone sits and closes the folder until the assistants have finished collecting the copies.
- Restroom breaks are allowed (after the first 30 minutes), but an assistant has to go with you up to the door (of the restroom). Only one student at once, so please try to be mindful of others :)
- In your solutions you may only use results (any) proved/covered in the lectures or in the lecture notes, unless of course this makes a question trivial. When doing so, you must clearly state the results you use.
- Your solutions must be legible and carefully written.
