

In Silico Neuroscience Course:

Tutorials instructions

1. From the course moodle platform download the jupyter notebooks for the tutorials and exercises.
2. Upload the tutorials and exercises into the NOTO platform: <https://noto.epfl.ch>
3. Read, understand and run the tutorials.
4. Solve the homework by yourselves or in groups (it is up to you)
5. Be aware! **Questions related to this exercises will be part of the tests.**
6. If **any doubt** you can ask the TAs **during the 2 hours of exercises** (mainly), you can also ask through email along the week but understand that this won't be as efficient as asking in person.

In Silico Neuroscience Course: TAs information
